

### **TERiX Lands Additional International Clients**

New Clients in Europe, Asia Pacific Embrace Better Service, Better Value.

SUNNYVALE, CA (July 23, 2009) – TERiX has been awarded several large data center support contracts in Europe and Asia in the first period of 2009, among them, two prominent finance/banking and clearinghouse veterans.

“The state of the economy has CIO’s and CFO’s around the world joining forces to drive change,” said Larry Quinn, TERiX Director, Sales-Marketing-Contracts.

“Reduced budgets in the datacenter have companies re-visiting the old fashion practice of service exclusively with the OEM. Clients are looking for flexibility, innovation, quality and value - and that defines TERiX.”

In the first quarter of 2009, TERiX added to its supported clients a financial services company infrastructure that included 8 Data Centers in 4 Asia Pacific region countries. The quarter also saw the renewal and increased footprint of contracts with 45 existing international firms working with TERiX. In the second quarter, TERiX added several UK-based data centers of a London-based financial firm that clears a broad range of asset classes including: securities, exchange traded derivatives, energy, freight, interbank interest rate swaps, that works closely with market participants and exchanges to identify and develop clearing services for new asset classes.

“TERiX is especially strong internationally in banking and finance,” Quinn stated. By example – TERiX supports 16 data centers of European Stock Exchanges and currently has 20 of the Top 200 financial/banking/investment firms, with US and international data center operations under contract.
